SUMMARY

Machine Learning Developer with 2 years of experience in data analysis and predictive modeling using Python and basic ML algorithms. Skilled in data preprocessing and model evaluation with strong analytical abilities.

SKILLS

- Languages: Python
- ML: Machine Learning Basics, Regression, Classification
- Libraries: Pandas, NumPy, Scikit-learn
- Database: MySQL
- Concepts: Statistics, Data Analysis, Feature Engineering

PROJECTS

Sales Prediction Model
- Built regression model using Scikit-learn for sales forecasting.
- Performed data cleaning and feature engineering.

Customer Segmentation
- Implemented clustering algorithms for customer segmentation analysis.

EXPERIENCE

ML Developer — DataInsights Pvt Ltd | Jul 2023 – Present
- Built predictive models for structured datasets.
- Performed data preprocessing and model testing.
- Assisted in data analysis and reporting tasks.

EDUCATION

B.Sc in Computer Science — Vadodara, Gujarat
